Opening Keynote

Enterprise AI Strategy for Indian Pharma.

From pilot to scale

WHAT YOU'LL HEAR

- The data foundation every AI project needs before deployment
- The data foundation every AI project needs before deployment
- The data foundation every AI project needs before deployment

Regulatory Keynote

The ISPE GAMP AI Guide.

What Pharma IT Must Know.

1

Who is accountable?

When AI makes a quality recommendation
in a GxP process

2

How do you validate?

An AI model that learns and changes over
time

3

What must be documented?

Before deploying AI in a regulated
environment

Panel Discussion

Data Governance in Regulated Environments.

ALCOA++

Regulatory traceability
data integrity framework

Data Mesh

Decentralised
modern data ownership

"Who owns data in a decentralised pharma enterprise — and what happens to regulatory traceability?"

4 conversations. Chatham House rules.

TABLE 1

AI Validation

Applying GAMP 5 to ML models in practice

TABLE 2

Data Governance

Building FAIR data platforms without boiling the ocean

TABLE 3

Cloud GxP Security

Securing SaaS/cloud in validated environments

TABLE 4

Enterprise AI Strategy

Build vs Buy vs Partner for pharma AI

Panel Discussion

Building AI Talent & Culture in Pharma.

Every CIO in this room faces the same talent crisis. Not enough AI-capable people — and a culture that resists change."

Build vs Buy vs Partner

Hiring AI talent vs reskilling vs IT services partners

Culture of Experimentation

How to innovate inside a compliance-heavy environment

The Change Resistance

Why plant teams resist AI — and how to change that

Real deployments. Not vendor demos.

11:45 – 12:15

Predictive Quality & Yield Optimisation

From data problem to production AI deployment.

15:00 – 15:30

AI-Powered Drug Discovery & Trials

How AI is reshaping R&D and clinical ops.

16:30 – 17:00

RPA & Intelligent Automation in Supply Chain

Real ROI in months, not years.

Closing Keynote

The Future of Pharma IT. 2030 Vision.

THE 4 SHIFTS EVERY PHARMA CIO MUST PREPARE FOR

1

AI-native pharma
operations

2

Autonomous quality
systems

3

Digital supply chain twins

4

Personalised medicine IT

What you take home.

A 2030 Pharma IT Framework

Language and structure to bring back to your leadership team. Built from real peer dialogue — not analyst reports.

Peer Intelligence

What India's top 15 pharma CIOs are actually doing with AI. Candid. Unfiltered. Chatham House.

Regulatory Clarity

A practical GAMP AI Guide readiness checklist. Know exactly what inspectors will ask — before they ask it.

Your Next 90 Days

Every session ends with one actionable idea. You leave with a prioritised action list — not just inspiration.

A Network That Lasts

130+ pharma IT leaders. Curated, not crowded. The CXO roundtable alone is worth the day.

Content Asset Access

All session summaries + GFACTS Insights Report delivered post-event. Reference it all year.

Reserve your seat.

Curated. Not crowded. Invitation-only.
